

Competency Check 360 with AI

Assess Employee Skills and Pinpoint Training Needs with AI-Powered Precision

THORS Competency Check 360 with AI enables organizations to conduct precise, targeted assessments based on specific job roles and required competencies—giving you clear visibility into workforce readiness.

Product Highlights

- ✓ AI converts job descriptions and SOPs into structured competency assessments.
- ✓ Flexible quiz builder generates custom evaluations tailored to specific roles.
- ✓ Comprehensive reporting dashboards deliver actionable insights.
- ✓ Also includes 230+ ready-to-deploy technical assessments across key business functions.

Reveal Critical Skill Gaps

Measure employee knowledge against real job requirements and identify role-specific strengths and gaps with precision. AI-driven analysis removes guesswork and provides clear visibility into capability at the individual or team level.

Build Role-Specific Assessments Instantly

Save time and eliminate manual HR processes – simply upload your job descriptions, SOPs or work instructions and AI automatically generates targeted assessment questions aligned to each role.

Focus Training Where It Matters

Use assessment insights to deliver personalized learning that targets the knowledge and skills employees need most.

Make Confident Workforce Decisions

Support certification, hiring, and workforce development decisions with clear, data-driven insight.
